

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

cum solutionibus vitriolorum pure martialium, & præ cæteris cum liquore Martis sôlari, omnium pulcherrimo colore cæruleo inficiebatur. Cum primis quatuor solutionibus vitriolicis vero eodem se modo habuit, ac cœteri spiritus frumenti fucati, imo non secus ac ipse spiritus vini Gallici.

XI. Tandem cum satis essem confirmatus, rem cum ramentis ligni quercini optime succedere, experiri libuit, quantum infusi vel extractionis ligni quercini, ad minimum pro aliquali saltem cœruleato colore producendo requireretur.

Varias ergo quantitates minuendo semper parci res, à dimidia drachma ad viginti, quindecim & pauciores guttas descendendo, probavi, adeo ut unica gutta sufficeret totam semiunciam spiritus frumenti qualitate imprægnando, quæ ad colorem cœruleum, licet non adeo saturatum, unica saltem gutta liquoris mineræ martis accedente, producendum requiritur.

III. *An Account of a Fork put up the Anus, that was afterwards drawn out through the Buttock; communicated in a Letter to the Publisher, by Mr. Robert Payne, Surgeon at Loweltofft.*

JAmes Bishop, an Apprentice to a Ship-Carpenter in Great-Yarmouth, about 19 Years of Age, had violent Pains in the lower Part of the *Abdomen*, for 6 or 7 Months; it did not appear to be any Species of the Colick; he sometimes made bloody Urine, which induced me to believe it might be a Stone in the Bladder. He was very little relieved by Physick; at length a hard Tumor appeared in the Left Buttock, on or near the *Glutæus Maximus*, 2 or 3 Inches from

the Verge of the *Anus*, a little sloping upwards. A short time after he voided purulent Matter by way of the *Anus*, every Day for some Time; the Tumor broke; I suspected a Fistula *in Ano*, but could not get the Probe, by the Orifice of the Sore, into the *Rectum*. Shortly after the Prongs of a Fork appeared through the Orifice of the Sore, above half an Inch beyond the Skin. As soon as the Prongs appeared, his violent Pains ceased; I divided the Flesh between the Prongs, according to the best of my Judgment; and after that made a circular Incision about the Prongs, and so with a strong Pair of Pincers extracted it, not without great Difficulty, Handle and all entire; the End of the Handle was besmeared with the Excrement, when I drew it out; it is 6 Inches and a half long, a large Pocket-Fork; the Handle is Ivory, but is dyed of a very dark-brown Colour; the Iron Part is very black and smooth, but not rusty. He is likely to do well in a short Time, the Operation being performed the 11th of *October* last; he would not own how it came, till a Relation of his, a Gentleman in this Neighbourhood, who sent him to me to be under my Care, the Reverend Mr. *Gregory Clark*, Rector of *Blundeston*, on whom, in a great Measure, his Dependence is, threatened never to look upon him more, unless he would give him an Account how it came; and he told him, that, being costive, he put the said Fork up his Fundament, thinking by that Means to help himself, but unfortunately it slid up so far, that he could not recover it again.

Lowestofft, 7 Miles from
Great-Yarmouth, 5th
Novemb. 1725:

Rob^t Payne.

P. S. He says he had no Trouble or Pain, till a Month, or more, after it was put up.
